

# Ideas for 4-5's

## Communication, Language and Literacy

### Recycle Week

It is really important that we should try to recycle materials in our home. Help to recycle the items in your house. Can you find out what else we can recycle, old clothes, food, old furniture. By recycling we are helping to save the planet.

## Maths

Making your own art work with items that are in and around the house. Old pegs, paper clips, rubber bands, washers, nuts and bolts. On a piece of paper create your picture. You could always take a picture of it and start all over again and create another one.

## Physical

Can you make your very own planet, Earth, where we live. Using an balloon and find blue and green tissue paper for the colours and stick on with glue. This is paper mache which is easy to do.

Find out facts about the world, look at images of what Earth looks like.

## Emotional and Mental Wellbeing

Place a large piece of paper on a flat surface, using green and blue paints, use your hands to explore and make a picture of the world, Earth. Or use tubes to create patterns. Lots of fun to feel the paint on your hands.
