

Ideas for 4-5's

Communication, Language and Literacy

When they are home from school, feeling refreshed after a drink, have a chat about their day. Or wait till they are ready to tell you what they have been learning that day. Making time to listen is important to them. You could tell them about your day too!!

Maths

A good way to look at shapes, made with lolly pop sticks. Write the name of the shape they can make such as square, triangle, hexagon.

They will start to recognise the shapes and the written words for them.

Physical

The walk to school can be exciting but also a daunting experience. Make sure to walk the route to school together before starting, look at the focal points on the way. This may help on the first day.

Emotional and Mental Wellbeing

Talk to the children about starting school and the friends that they may make, activities they will be doing, who they will see at school everyday, what the teachers name is? Does their classroom have a number or name? That they will have lots of fun too.
